Solar ramps

The solar ramps are suitable for ground installation and as a flat roof system, both in the middle zone, as well as in the edge and corner zones. For example, on garage boxes, apartment buildings and extension roofs

Three types of ramps are available to position panels, up to a maximum panel size of 1150x2300mm, one above the other in landscape:

- ValkDouble for 2 panels
- ValkTriple for 3 panels
- ValkQuattro for 4 panels

Applicability and supplies

The ramps can be ordered in individual components. Together, these items form the standard version of the ramp. The ramp can be supplemented with extra articles from Van der Valk Solar Systems, such as extra ballast, ValkCableCare and other service products.

ValkKITSp planner

When a solar ramp is calculated using the online calculation software ValkKITSp planner, the required parts and quantities are displayed, from which a bill of materials including price is shown.
